

Argentina electric vehicles evs

Overview

The electric car market in Argentina began 2026 with an unprecedented growth. In January, 533 units were registered nationwide. This figure represents a jump of 278% compared to December 2025. The market is driven by increasing government incentives supporting sustainable transportation. A demonstration of the compact Tito, the first Argentine-made electric car. (Image: CORADIR) At 9am on a Wednesday in December 2012, Pablo Laiolo started the engine of. For a country with a burgeoning electric vehicle (EV) Market, making the correct policy, infrastructure, and production decisions now could spur adoption in the coming years. In 2022, fewer than 500 electric vehicles. As the adoption of electric vehicles (EVs) grows, Argentina is all of a sudden drawing interest from around the world for its lithium deposits, which are required to supply the expanding global demand for battery production. Over the next ten years, it is anticipated that the demand for lithium and. We have recently revised our forecasts for Argentina's EV market and now expect passenger EV sales to grow from 666 units in 2024 to 2,020 units in 2025 – a 210% y-o-y increase – primarily due to the elimination of tariffs on electric and hybrid vehicle imports.
