

Brussels electric vehicles

Overview

A total of 145,170 electric vehicles were sold in Belgium in 2025, up from 127,759 in 2024 (+13. This growth translated into a 35% market share, meaning that more than one in three newly registered cars in Belgium was electric. We're here to bring a breath of fresh air to Brussels and fight climate change at the same time! By switching to sustainable transport. Belgium recorded another landmark year for electric vehicles (EVs) in 2025, confirming its position as one of Europe's leading EV markets. Despite challenging economic conditions, EV adoption accelerated across passenger cars, vans and trucks, while charging infrastructure expanded at an. In a groundbreaking move, Brussels has embraced the conversion of traditional combustion engine vehicles into electric models, marking a significant step toward sustainable transportation and climate change mitigation.
