

Canada Energy Storage Project Subsidy Time

Overview

- Clean Technology ITC: Up to 30% refundable tax credit for investments in solar, wind, hydro, geothermal, and energy storage projects. There are an additional 27 projects with regulatory approval proposed to come. The Smart Renewables and Electrification Pathways Program (SREPs), launched in 2021, is a \$4.5-billion program designed to support the deployment of grid modernization, energy storage and renewable energy technologies in every region of Canada, helping to grow the grid in a sustainable, affordable. The Government of Canada is supporting Canadian utilities and system operators that are working to clean their electricity, integrate clean solutions such as utility storage systems and micro grids, and meet the demands of increased electrification at the least cost to rate payers. These measures. Ever wondered how Canada plans to keep the lights on while phasing out fossil fuels?

Enter the Canadian energy storage subsidy —a game-changer for utilities, businesses, and even homeowners looking to store renewable energy. We focus exclusively on energy storage and speak for the entire industry because we represent the full value chain range of energy storage opportunities in our own markets and internationally.
