

Is Mexico developing solar power generation for home use

Overview

Mexico produces no more solar power today than the Netherlands, and CFE has taken a step toward sustainability by introducing a solar panel installation service for homes. MEXICO, Sep 15 2025 (IPS) - Over the past four months, Mexican researcher Nicolás Velázquez has paid around US\$23 for electricity, thanks to the photovoltaic system installed in his home in the northern city of Mexicali. "You can see the direct benefit. My neighbor received a bill over US\$400. The. Mexico's National Power System Development Program (Programa de Desarrollo del Sistema Eléctrico Nacional or PRODESEN The installed capacity of renewable energy mainly came from hydro, wind, and photovoltaic solar PV plants. This installed capacity from clean energy plants is projected to increase. Mexico is seeing a surge of large-scale solar and battery storage proposals across multiple states following an October decree that sets clearer rules for private energy investments. Mexico is well suited for residential rooftop solar installations, and the market is expected to grow by roughly 10 to 15. Solar power in Mexico contributes 27. 55 TWh of generation to the Mexican grid, accounting for 7. 99 GW of installed capacity, up from 0.
