

Italian energy storage equipment procurement

Overview

Across three auction rounds, MACSE aims to support up to 50 GWh of storage capacity. Award 15-year fixed revenues, plus a 20% share of ancillary services market. On October 11 th, the Minister of the Environment and Energy Security, Gilberto Pichetto Fratin, formalized the decree for the centralized electricity storage system. The storage capacity acquisition mechanism, known as Macse, had already received the green light from the European Commission last. The Electricity Storage Capacity Procurement Mechanism (in Italian “Meccanismo di Approvvigionamento di Capacità di Stoccaggio Elettrico”: MACSE) is a regulatory initiative aimed at fostering the growth of electricity storage capacity in Italy. This growth is crucial to accommodate the increasing. Italy's new MACSE mechanism introduces long-term capacity contracts for battery storage - the first scheme of its kind in Europe. Many have praised Terna's structuring of the scheme but also.

REGULATION OF THE ELECTRICITY STORAGE CAPACITY

The SdS has a functional relationship with another generation group, but this generation group uses the same primary energy source for the production of electrical energy;

Italian energy storage auction MACSE postponed until

Italian transmission system operator (TSO) Terna said that Italy's first energy storage capacity procurement mechanism (MACSE) will be postponed

Italy awards all battery storage in first auction, Enel wins half

Italy awarded all 10 gigawatt hours of the capacity it tendered in its first battery storage auction, recording an average price well below the cap set by the regulator, the CEO of grid...

Update on Italian BESS investment case & MACSE bidding

2025 is set to see the start of a surge in Italian storage asset investment, led by BESS. The catalyst for this is the implementation of the new MACSE policy support mechanism, offering 15

Italian energy storage machinery and equipment procurement

Italian transmission system operator (TSO) Terna said that Italy's first energy storage capacity procurement mechanism (MACSE) will be postponed until September 2025.

Italy's Energy Storage Breakthrough: How Recent Auction Wins Are ...

Why Italy's Energy Storage Auction Matters Now You've probably heard about Italy's latest energy storage auction results—but do you know what they really mean for Europe's green transition? In

Italy's MACSE and the future of BESS asset management in Europe

Italian state-backed utility and power firm Enel won just over half of the 10GWh of awarded capacity in TSO Terna's long-term battery energy storage system (BESS) capacity

MACSE: Fixed returns to scale up storage

Italy's new MACSE mechanism introduces long-term capacity contracts for battery storage - the first scheme of its kind in Europe. Across three auction rounds,

Italy: the rise of utility-scale energy storage technologies

Italy's laws for the development of utility-scale energy storage The Italian legislator has intervened, specifically in the development of storage capacity, by introducing a long-term

Battery Energy Storage Systems (BESS)

Therefore, battery energy storage systems (BESS) are needed in Italy. The Italian market for BESS is growing rapidly and currently amounts to 2.3 GW but it almost exclusively consists of

MACSE auction: A game changer for Italy's energy

Advertisement From ESS News 2025 is set to see rapid growth in investment in the Italian energy storage sector, led by battery energy storage

THE ELECTRICITY STORAGE CAPACITY PROCUREMENT

This document analyzes available electric storage technologies and identifies reference technologies, those deemed feasible and capable of meeting identified electric storage demands.

Italian grid company Terna fields 100 GW+ requests for MACSE energy ...

Italian electricity TSO Terna has received more than 100 GW of requests to participate in the energy storage auction it is planning before summer 2025. The first phase of the MACSE tender

Italy's Macse proposal gets thumbs up

With Ministerial Decree no. 346 of 10 October 2024 (the “Macse Decree”), Italy's Ministry of the Environment and Energy Security (“MASE”) has

MACSE: Mechanism for the procurement of electric

Legislative Decree 210/21 introduced a new mechanism for the procurement of electricity storage capacity (“MACSE”), developed with the aim of

Italy Energy Storage

Italy's energy mix is increasingly composed of variable renewable energy sources. Electricity storage is needed to integrate renewables into the grid.

Energy Storage Systems in Italy: a new mechanism for the procurement

This mechanism would allow the national energy system to acquire new storage capacity, by means of multi-year supply contracts to be awarded to subjects in the availability of

Italy's first MACSE battery auction smashes expectations with 10 GWh ...

Held on September 30, the tender closed at an average price of just €12,959 per MWh per year, far below the reserve price of €37,000 per MWh per year set by system operator Terna. Interest

Marketwatch: Italy "most vibrant" European storage market

MACSE storage procurement mechanism expected to be catalyst for storage surge in 2025 Italy is arguably the most vibrant European energy storage market at present.
