

Latvia Farms Use 200kW Folding Container

Overview

Latvia-based Carbon Less Future (CLF) is building a new model for reforestation, one shipping container at a time. Their container-based tree-growing system, designed around vertical farming principles, can cultivate up to 33,600 saplings in a single cycle. While vertical growing systems are not a new idea in horticulture, until now they have typically been used for strawberries, lettuce, and vegetable seedlings. This product is a 200kW/480kWh industrial and commercial integrated energy storage cabinet utilizing Lithium Iron Phosphate (LFP) battery cells. Supplier highlights: This seller stands out with very high customer satisfaction, boasting a 100. At this point in time, we have microgreens farms, strawberry containers, and we're now working on a mushroom farm," says Peteris Ozols, Production & Design director and. "We're growing more and more into vertical farming as we're developing various container farms for customers across Europe.
