

Lead-acid 35A battery size picture

Overview

When purchasing a battery, you will see a series of numbers and letters in the name. These numbers and letters are the BCI group size of the battery. BCI is the most common system used to classify battery group sizes. The following battery group size chart explains the most common BCI battery groups and their specifications. When choosing a battery, it is important to use the ones that are recommended by the manufacturer for your make and model of the vehicle. The easiest way to find out what battery group you. First, each vehicle comes with a specific battery tray size, whether it's a car, truck, SUV, commercial vehicle, boat, recreational vehicle, or other vehicles. It is important to choose a battery that has a snug fit in the tray. Otherwise, the battery could move around and. The BCI designations include the group definition, dimensions, measurements, types, sizes, and other characteristics. The battery conversions chart.
