

Liberia solar Module Project

Overview

Siatech Africa, a leading technology and infrastructure solutions company, has announced the completion of Liberia's first fully solar-powered city, a landmark project that combines clean energy, digital connectivity, and community innovation. Technology GmbH is a German engineering company specializing in turnkey solar module production lines and manufacturing consulting, with project experience ranging from 20 MW to 500 MW per production line, including multi-line and gigafactory projects exceeding this scale. President Joseph Nyuma Boakai presided over the ceremony on October 11, 2024, in Harrisburg, Montserrado County, launching the US\$90 million. EA is leading a phased solar power development program across Liberia, beginning with a 120 MW pilot project. The initiative is currently under negotiation. In a statement on Tuesday, the company said the. The Liberian Government through the Liberia Electricity Corporation (LEC), has signed a Power Purchase Agreement (PPA) with the Titan Group of Companies for the development of a 200MWp solar photovoltaic Power Plans to be located in Grand Cape Mount County.
