

Melbourne solar electricity price list

Overview

Australia is home to some of the best solar energy resources in the world. Although Melbourne, Victoria is a bit further south than Brisbane or Sydney, there's still enough sunshine to make panels a worthwhile investment. According to PVWatts, a typical Melbourne home's roof receives about 4.8 kilowatt-hours. Thanks in great part to the STC rebate and the Victorian State scheme, Melbourne is home to some of the lowest PV system installation. According to our analysis, Victorians who are eligible for the Solar Victoria rebate have the best case for solar anywhere in Australia, including those in the sunny northern parts. As you can see in the table below for typical use cases, solar panels Melbourne customers can. Federal STC Upfront Rebate For those looking for solar rebates, the federal government's Renewable Energy Target contains a mechanism that reduces the up-front cost of solar.
