

Musk's solar and energy storage business

Overview

In addition to championing solar-powered space-based AI at the World Economic Forum (WEF) in Davos, Switzerland, last week, Tesla founder and CEO Elon Musk also shed light on earth-based plans at Tesla and SpaceX to produce PV technology in the U. Elon Musk targets 100 GW of annual solar manufacturing for both Tesla and SpaceX within three years to solve the energy bottleneck threatening the AI revolution. But its latest results have surprised to the downside. Simultaneously, Tesla officially released its new self-developed solar modules, the TSP-415/420, completing a fully integrated. Morgan Stanley predicts it could cost as much as \$70 billion for Elon Musk to reach his goal of 100 gigawatts of solar manufacturing capacity Although Tesla is best known for its electric-vehicle business, it also has a growing energy generation and storage division. Elon Musk's plan to make Tesla. Tesla reported record energy storage deployments and business segment profits in Q3 2025, just ahead of a shareholder vote on CEO Elon Musk's historic remuneration package. The US electric vehicle (EV), energy storage, software and robotics company reported its third quarter results last week (22. The electric vehicle (EV) OEM released its Q3 2024 financial results on Wednesday (23 October).
