

Off-grid solar energy storage cabinet for urban lighting

Overview

The Outdoor Photovoltaic Energy Cabinet is an all-in-one energy storage system with high strength, which can work under harsh environmental conditions to supply high-performance energy backup and regulation. An outdoor integrated energy cabinet is a modular enclosure that houses: All components are installed inside a weatherproof outdoor cabinet with optimized thermal management and safety protection. Designed for harsh environments and seamless integration, this IP54-rated solution features a 105KW bi-directional PCS, optional air- or liquid-cooled thermal. AZE's battery energy storage system (BESS) are designed to store 19" lithium batteries, inverters and electrical components in one outdoor cabinet, with features like high energy density, battery management, multi-level safety protection, an outdoor cabinet with a modular design. Engineered for reliability and performance, it provides a durable and efficient enclosure for.
