## Overview

The tile type photovoltaic tiles embed high-efficiency power generation modules into the metal roof, deeply integrating them into an integrated form to build a metal roof that generates high-efficiency power. The Marley SolarTile® is a solar roof tile that acts as a roof covering while also generating renewable energy, it features a low profile and streamlined appearance. The product meets the A-level fire protection standard, can effectively prevent the. Integrated hybrid solar + kinetic energy technology for 24/7 energy generation. The first kinetic tiles with built-in lighting powered 100% from footsteps. 37 countries, 300+ projects, 1 Billion+ steps and counting. These innovative tiles are designed to blend seamlessly into the roof of a building while harnessing the power of the sun to generate. Novelty architecture buildings can be tiled with conventional rectangular solar photovoltaic (PV) modules with both close-packed cells or partially transparent modules, vastly increasing renewable energy, reducing carbon emissions, and allowing for positive energy buildings.
