

Which power supply should i choose for outdoor electric fans

Overview

For RV use or outdoor live broadcasting, a 2500W power supply (2500Wh capacity, 1000W peak power) is the best choice. It includes PD100W fast charging to efficiently charge. Choosing between DC and AC motors for outdoor fans depends on factors like efficiency and durability—discover which suits your needs best. DC motors run quietly, offer precise. At Perfect, we supply three kinds of motors (AC,DC and EC) to provide energy for the fans. Hence, Fans are commonly categorized based on the type of current they use: AC (alternating current), DC (direct current), and EC (electronically commutated). With output capacities ranging from 500W to 2500W, there are various options available for different use cases. An alternating current fan will have a voltage rating above 100 such as 110V or 240V. This article will delve into how to select the power supply for outdoor lighting.
